

Park Elementary Medical Center

How will I know if this program is right for my child?

Students will be immersed in an inquiry and project-based exploratory model providing them the opportunity to experience various aspects of the medical and healthcare fields, including but not limited to forensics, medical technology, pharmaceutical, nursing and clinical studies, which will serve as a catalyst for theme-based opportunities aligned with programs at the high school level.

Students who may be interested in this program should have an interest or aptitude in one or more of the following areas:

Interest Areas

- Help sick people and animals
- Enjoy health and science classes
- Learning about the body and how it works
- Healthy/living choices
- Care about people, their needs, and their problems

Physically

- Working with their hands
- Interacting with others in group settings
- Work in a laboratory setting
- Participate in community services and volunteering

Academically

- Aptitude for science and mathematics
- Ability to interpret data

Leadership Skills

- Help people overcome their challenges
- Self-directed and follows instructions without close supervision

Social and Emotional

- Communicate with different types of people
- Works well with computer programs
- Comfortable creating reports, analyzing data and communicating ideas
- Comfortable exploring new technology

Independent Learner

- Figures out how things work and investigates new things
- Make decisions based on observations
- Experiments to find the best way to do something
- Pays attention to details and ensuring accuracy and precision
